Gabriel Manukyan

Senior Software Engineer | Full-Stack TypeScript & AI Products

Yerevan, Armenia · Open to remote
gabriel@quantumdesign.dev · quantumdesign.dev
github.com/gabrielmanukyan · linkedin.com/in/gabriel-manukyan-223bb7a4

Full-stack engineer building TypeScript web products and practical AI features. Owns frontend, backend and delivery, combining international client work with LLM integration, AI-assisted engineering and workflow automation.

TECHNICAL SKILLS

Frontend: TypeScript, JavaScript, React, Next.js, storefront UX
Backend & data: Node.js, SQL, PostgreSQL, Supabase, row-level security, REST APIs
AI & automation: OpenAI API, Gemini, tool calling, structured output, moderation, Cursor, Codex
Delivery: Vercel, Railway, Git, CI, PR workflows, pnpm, Turborepo

PROFESSIONAL EXPERIENCE

Senior Software Engineer & Founder | Jul 2022 – Present
Quantum Design LLC · Yerevan, Armenia · Remote

- Deliver production web features for emarkable B.V. and its EU merchant clients, owning scoping, estimation, implementation and release as their primary engineering partner.
- Build product configurators, B2B quantity-based ordering, collection filtering, cart and variant flows, and booking experiences across commerce storefronts.
- Work directly with agency stakeholders on requirements and delivery; implement storefront UX and performance improvements on Shopify and Lightspeed.

SELECTED PRODUCTS

Independent ventures developed concurrently with client work.

Full-Stack / AI Engineer & Founder | Jan 2025 – Present
WIIT · askwiit.com · Solo-built · In active development

- Solo-built a timed, two-sided debate product with earned voting Power, challenge waiting rooms, one-on-one debates and achievements.
- Implemented OpenAI-powered debate bots with bot tiers, moderation, prompt and voice tuning, LLM error handling and feature flags.
- Built the Next.js and TypeScript application on Supabase/PostgreSQL with migrations and row-level security; deployed web and worker workloads through Vercel and Railway.

Backend, Admin & AI Engineer · Cofounder | Sep 2026 – Present
PingStay · Multi-tenant hotel concierge · In active development

- Build a multi-tenant QR hotel concierge spanning guest ordering in Armenian, Russian and English, staff station boards, hotel admin and super admin.
- Own backend, staff/admin interfaces and infrastructure in a pnpm/Turborepo monorepo of Next.js apps with shared types and API contracts.
- Implement per-hotel row-level security and feature flags in Supabase; prototype an AI concierge with Gemini and establish onboarding and PR workflows.

Game Developer & Solo Founder | Jun 2025 – Present
Afterbounce · Unity · In development · Planned launch Mar 17, 2027

- Develop a pixel-art arcade roguelike in Unity, reimagining brick-breaker with ball-shaped heroes, abilities and ultimates.

AI-ASSISTED ENGINEERING & AUTOMATION

- Configure and operate personal AI bots and scheduled routines for briefings, job discovery and monday.com task checks.
- Use Cursor cloud agents and Codex with CI and PR workflows; configured daily product-walkthrough QA and PR auto-review routines while retaining architecture and release ownership.

EDUCATION

B.Sc., Chemical Technology of Organic Substances · 2008 – 2012
State Engineering University of Armenia, Yerevan
