SUMMARY

Full-stack TypeScript and AI product engineer with ~16 years in agency ecommerce development. Builds production web apps end to end—Next.js, Node, Postgres/Supabase, Vercel/Railway—and ships LLM features with moderation, tool calling, and structured output. Founder of Quantum Design LLC (Armenia); primary engineering partner to emarkable B.V. (Netherlands) on complex commerce storefronts. Deep domain experience in Shopify, Lightspeed, and headless commerce; leads with product engineering and AI systems rather than platform specialization.

SKILLS

Languages & frameworks. TypeScript, React / Next.js, Node.js, JavaScript, SQL
Data & backend. Postgres / Supabase (migrations, RLS), REST APIs, shared types & API contracts
AI / LLMs. OpenAI & Gemini integration, tool calling, structured output, moderation, prompt & voice tuning, feature flags
Infra & delivery. Vercel, Railway, Git / CI, PR workflows, pnpm / Turborepo monorepos
Commerce domain. Shopify / Liquid, Lightspeed, headless commerce, storefront UX, B2B ordering, product configurators

EXPERIENCE

Founder & Senior Software Engineer
Jul 2022 – Present

Quantum Design LLC · Yerevan, Armenia · Remote · Serving emarkable B.V. (Netherlands)

- Founded and run an engineering studio delivering full-stack ecommerce systems for a Dutch digital agency and its merchant clients across the EU.
- Own theme development, custom storefront features, cart/variant flows, and performance work on Shopify and Lightspeed—treated as domain depth, not identity.
- Ship production features end to end: product configurators, B2B/quantity-based ordering, collection filtering, cart improvements, and appointment/booking UX, from scoping through production release.
- Partner directly with agency stakeholders to scope, estimate, and deliver on tight timelines with minimal supervision.

> **SELECTED CLIENT WORK (ANONYMIZED)**
> Kitchen & Bathroom Megastore (NL) · Sustainable Cat-Care Brand (EU) · Premium Goalkeeper Brand · Designer Furniture & Lighting Brand · B2B Building Materials Supplier (NL) · Flagpole Manufacturer (NL) · Family Shoe Retailer Since 1931 (NL) · Natural Dog-Snack Brand

Founder · Full-Stack / AI Engineer
Jan 2025 – Present

WIIT · askwiit.com · Solo-built product · In active development

- Built a timed two-sided crowd-debate product with earned vote "Power," challenge mode (waiting room, 1v1), and an achievement system.
- Stack: Next.js, TypeScript, Supabase/Postgres (migrations, RLS), Vercel, and Railway workers.
- Shipped AI debate bots on the OpenAI API with moderation, prompt and voice tuning, LLM error handling, and feature flags.
- Established CI and PR workflow; develops with AI assistance (Cursor, Codex) while owning architecture and production quality.

Cofounder · Backend, Admin & AI
Sep 2026 – Present

PingStay · Multi-tenant hotel concierge · Cofounded with brother · In active development

- Building a multi-tenant QR in-room hotel concierge: guest ordering (HY/RU/EN), staff station board, hotel admin, and super admin, with per-hotel feature flags.
- Owns backend, staff/admin console, payments, infrastructure, and AI; architecture is a pnpm/Turborepo monorepo of Next.js apps plus a shared types/API contract package.
- Supabase with row-level security per hotel; Gemini AI concierge prototype; team onboarding and PR workflow.

Solo Founder · Game Developer
Jun 2025 – Present

Afterbounce · Unity · In active development · Launching March 17, 2027

- Building a pixel-art arcade roguelike in Unity that reimagines brick-breaker, with ball-shaped heroes, abilities, and ultimates.

EDUCATION

B.Sc., Chemical Technology of Organic Substances
State Engineering University of Armenia, Yerevan · 2008 – 2012 · Transitioned into software through self-directed study.
